Stock Exchange Announcement

ITC Company CSG Limited (ASX: CSV) has acquired ATI Group Pty Ltd, a national Outsourced Printer Management business based in Canberra.

ATI is one of the leading brand agnostic printer management and consulting businesses in Australia with a number of major multi-year contracts for large Printer Management outsourcing deals.

The services offered by ATI for customers with large Printer fleets include consulting services on printer procurement strategy, technology selection, TCO reduction strategies and a whole of life printer managed service. The company has a number of contracts where it totally manages the Printer infrastructure fleet including procurement, ownership, management, breakfix and help desk services.

Commenting on the acquisition, CSG Ltd CEO, Denis Mackenzie said "ATI are a leader in Print Management Services in Australia and CSG has been investing in technology, people and resources to enter this space for some time. ATI fits perfectly into our strategy and "Print Management" in Australia is a fast growing sector and complements our existing businesses".

The acquisition of ATI also strategically gives our Infrastructure Outsourcing capability a presence in Canberra. Through the critical mass and platform both the existing CSG and ATI business will be able to expand and grow into the Federal Government Outsourcing space. This is particularly important given the recent trend in selective sourcing and the push for Australian based companies.

Mackenzie added, "ATI have a number of large outsourcing contracts in the Federal Government arena. Through CSG, ATI will enhance its capability to its customers by offering a more comprehensive range of products, services and resources".
